1. The current USIB requirement for GLASS LAMP coverage of Cuba calls for a report on the percentage of area coverage and the achievement against the requirement for target category sampling over a 56-day period. Following a review of activity at the [redacted] targets previously carried, the list was reduced to [redacted]. The attached tables show the number of missions flown and the percentage of success against the area coverage requirement as well as the target sampling average for a two week period. The current report is for the period 15 April - 9 June 1968.

2. During this period no activity was observed which might indicate an attempt to reintroduce or deploy offensive weapon systems in Cuba.

3. The USIB requirement was fulfilled and it is recommended that the Board note this report.
